

need to evaluate if there is a data gap

SFUND RECORDS CTR  
2290836

- DATA GAP
  - INCREASED risk assessment
- concerns have never been about human health
- incomplete CSM NO PCO evaluation.

Q: IF turbidity in well (GW) cause the dioxin hit & subsurface soil is not a problem where does the dioxin / turbid particulates come from? where is the screen?

Conceptual Site Model and Risk  
Evaluation  
Former Pesticide Mixing Site  
Waipio Peninsula, Oahu, Hawaii

?? Bas CSM → bad pathway  
evaluation → bad report

Need to screen against HI #'s

May 20, 2009

Project Number:  
03-15582B

## Contents

	<b>Page</b>
Executive Summary	ES-1
1 Introduction	1
1.1 Site Description	1
1.2 Previous Investigations and Enforcement History	2
2 Conceptual Site Model	4
2.1 Potential Contaminant Sources and Releases	4
2.1.1 Historical Site Development	4
2.1.2 Potential Contaminant Releases	6
2.2 Potentially Exposed Populations	8
2.2.1 Current Land Use	8
2.2.2 Future Land Use	9
2.3 Potential Exposure Pathways and Routes	10
3 Risk Evaluation	11
3.1 Tier 1 Screening Evaluation	12
3.1.1 Data Evaluation	12
3.1.2 Screening to Identify Chemicals of Potential Concern	13
3.1.3 Findings of the Tier 1 Screening Evaluation	14
3.1.4 Additional Herbicides Identified for Further Evaluation	15
3.2 Tier 2 Evaluation of Site- Specific Risk-Based Target Concentrations	16
3.2.1 Exposure Assessment	16
3.2.1.1 Identification of Potentially Exposed Populations	16
3.2.1.2 Exposure Pathways and Routes	17
3.2.1.3 Calculation of Intake Factors	17
3.2.1.4 Population-Specific Exposure Parameters	19
3.2.1.5 Route-Specific Exposure Parameters	20
3.2.2 Toxicity Criteria Selection	21
3.2.3 Calculation of Risk-Based Target Concentrations (RBTCs)	22
3.2.4 Findings of the Tier 2 Evaluation	24
3.3 Tier 3 Risk Evaluation	26
3.3.1 Trespasser in Area 1: (Western Portion of the Site)	27
3.3.2 Trespasser in Area 2: (Eastern Portion of the Site)	27
3.3.3 Security/Maintenance Personnel	28
3.3.4 Evaluation of Lead	29
